

Welcome !

Your first steps towards serenity,
visibility, and progress.

*Your support solution in
Project / Innovation / Organization Management
& System Engineering*

ABOUT

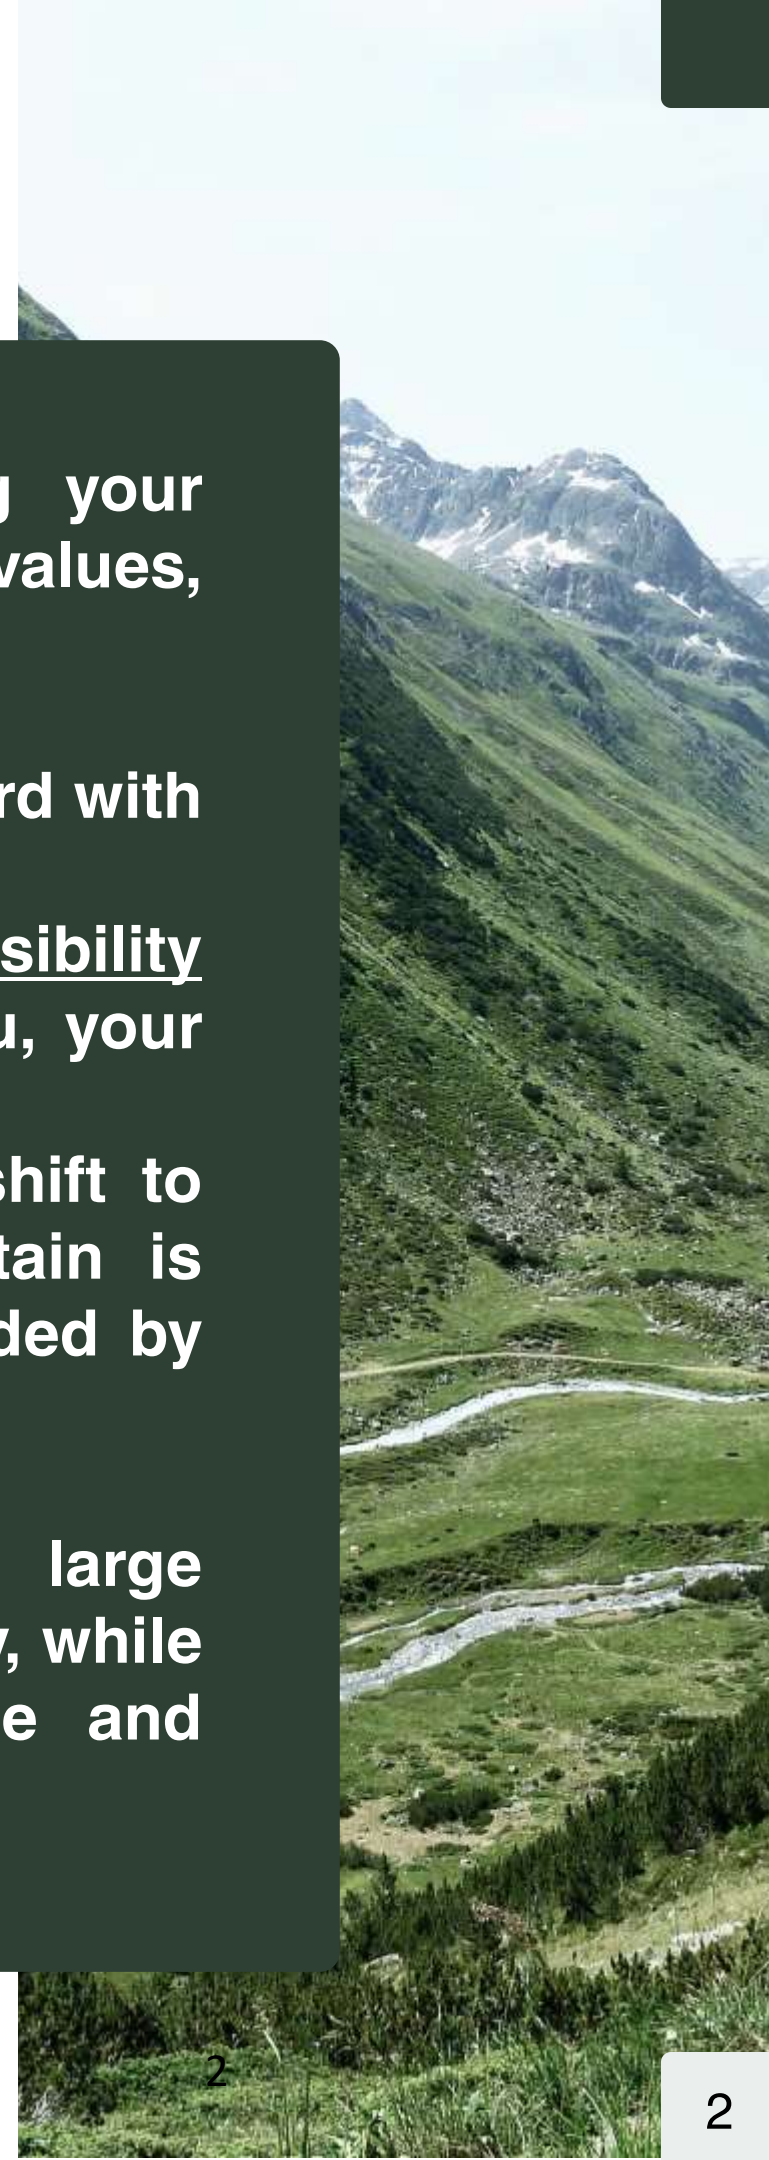

LAC Management takes a holistic approach by viewing your business as a true ecosystem. Humanity is at the heart of its values, and every solution is carefully tailored to your needs.

Like its logo, serenity is an essential priority for moving forward with confidence and focusing on what truly matters.

Faced with the unknown, often a source of apprehension, visibility becomes a lever of trust, fostering the balance between you, your professional partners, your suppliers, and your clients.

Once this solid foundation is established, the focus can shift to progress. What may seem like an insurmountable mountain is actually a series of manageable steps, provided one is guided by experience and equipped with a resolutely positive mindset.

LAC Management also encompasses the ability to offer large organizations an external perspective and increased flexibility, while providing smaller organizations with specialized expertise and personalized support.

Your needs

LAC Management Expertise

Antoine Lepreux

« As a trained engineer who has evolved in multi-technical systems, I subsequently focused on project management in R&D and innovation. At the same time, as a reserve officer, I had the opportunity to command a squadron and contribute to the work of a general staff. Today, drawing from this varied and enriching experience, I wish to offer my skills and expertise to assist you with your projects with professionalism and commitment. »

SERVICES

TOPICS

*Based on responses to the 2025 survey sent to all customers and participants.

■ In a few words

"As a specialist in the field of innovation and a proactive force, he designed tutorials in the form of an 'innovation challenge,' allowing participants to present and apply numerous tools in the field. Generating enthusiasm and directly applicable, the challenge will undoubtedly contribute to generating innovative ideas."

Colonel S., Training director, ESORSEM

"Great satisfaction with the quality of the feedback document and the exchanges with the company."

Frédéric PECH, associate director, SEQUOIA CONSEIL ET FORMATION

And much more ...
